TECTONOPHYSICS

Contents

Tectonophysics Volume 239

Research Papers

Calibration of shear-wave splitting in the subcontinental upper mantle beneath active orogenic belts using ultramafic xenoliths from the Canadian Cordillera and Alaska
S. Ji, X. Zhao and D. Francis 1

Palaeomagnetic evidence for post-thrusting tectonic rotation in the Southeast Pyrenees, Spain
P. Keller, W. Lowrie and A.U. Gehring 29

Paleomagnetic evidence for counter-clockwise rotations in the southern Apennines fold-and-thrust belt during the Late Pliocene and middle Pleistocene
P.J.J. Scheepers and C.G. Langereis 43

Paleomagnetic study of the eastern sector of Chapala Lake and implications for the tectonics of west-central Mexico
J. Urrutia-Fucugauchi and J. Rosas-Elguera 61

Cooling history of the Sanbagawa metamorphic belt inferred from fission track zircon ages
H. Shinjoe and T. Tagami 73

Late Cretaceous deformation of the Pieniny Klippen Belt, West Carpathians
M. Nemcok and J. Nemcok 81

Tectonic evolution of the emergent part of a volcanic ocean island: Lanzarote, Canary Islands
L.B. Marinoni and G. Pasquarè 111

Culminations and domal uplifts in the Himalaya
M.R.W. Johnson 139

Two-dimensional modelling and interpretation of seismic wide-angle data from the western Gulf of Bothnia
M.A. Riahi and C.-E. Lund 149

Characteristics of Romanian lithosphere from deep seismic reflection profiling
V. Răileanu, C. Diaconescu and F. Rădulescu 165

Effects of topography and climatic changes on the temperature in borehole GFU-1, Prague
J. Šafanda 187

Contents Volume 239, 1994 199
